Criterion: 7 **Institutional Values and Best Practices**

7.1: Institutional Values and Social Responsibilities

Geo-tagged photographs of the facilities for 7.1.3

7.1.3 - Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste (within 200 words)

- Solid waste management
 - Liquid waste management
 - Biomedical waste management
 - E-waste management
 - Waste recycling system
 - Hazardous chemicals and radioactive waste management
-

7.1.3: The Institution has facilities and initiatives for:

Management of the various types of degradable and non - degradable waste

- Solid waste management
- Liquid waste management

...continued

...continued

...continued

- Biomedical waste management

The management of waste from science labs adheres to the guidelines outlined in the Annual Quality Assurance Report of GOVT. COLLEGE SANJAULI, SHIMLA, as per the Department of Town and Country Planning's recommendations. These guidelines ensure the proper handling and disposal of biomedical waste generated within the institution

- E-waste management

- Waste recycling system

While the institute doesn't have its own dedicated waste recycling system, we have implemented a practice of collecting & segregating waste into specific bins. This segregation ensures that different types of wastes are collected separately, making it easier for the local administration to transport them to designated recycling facilities.

- Hazardous chemicals and radioactive waste management

The institution affirms that it does not possess hazardous chemicals as waste materials, eliminating the need for hazardous chemical waste management.
