

Plantation of Herbal Plants in College Campus

The Eco Club and Botany Dept of the Center of Excellence Sanjauli embarked on a mission to enhance greenery and environmental sustainability by participating in a plantation initiative with the Ministry of AYUSH. The objective of this initiative was to contribute to the greening of the college premises while promoting awareness about the importance of plants in maintaining a healthy ecosystem.

Plantation Proposal

On July 27, 2023, the members of the Eco Club and Botany Department submitted a formal proposal to the Ministry of AYUSH requesting permission to carry out a plantation of plants on their premises. The proposal highlighted the club's commitment to environmental conservation and its desire to create a more sustainable and ecologically balanced environment within the college premises.

Plant Procurement

After receiving approval for the plantation initiative, the Eco Club and Botany Department took prompt action to procure suitable plants. On August 8, 2023, the Eco Club coordinated with the Himalayan Research and Forestry Institute (HRFI) located in Panthaghati, Shimla, to source the plants. The HRFI, known for its expertise in

forestry and plant conservation, was chosen as the supplier due to their commitment to providing high-quality indigenous plants.

Plant Collection

The plants were successfully collected from HRFI on August 18, 2023. Dr. Sandeep Sharma, a distinguished scientist and director of HRFI, graciously handed over the plants to the Eco Club members at the HRFI premises in Panthaghati, Shimla. The plants were carefully selected to ensure they were well-suited for the local climate and soil conditions

Plantation Event

In keeping with the timeline, the members of the Eco Club proceeded to plant the acquired saplings within the college campus on August 21, 2023. The college campus itself served as the site for the plantation initiative. This strategic decision allowed students, faculty, and staff to witness and engage in the process, thereby raising awareness about the significance of environmental conservation.

The Eco Club's plantation initiative with the Ministry of AYUSH exemplified the commitment of the Center of Excellence GC Sanjauli students to environmental sustainability and conservation. The successful execution of the initiative, from proposal submission to plant procurement and eventual plantation, showcased the dedication and collaborative spirit of the Eco Club members. This effort not only contributed to a greener and healthier environment within the college premises but also fostered a sense of responsibility and stewardship among the student community. The Eco Club looks forward to nurturing and caring for the newly planted saplings, watching them grow into strong and resilient plants that will contribute to the overall well-being of the ecosystem.
