

# Visit to Water testing Laboratory Dhalli

On 4 th October 2023, 20 students along with 2 teachers Mrs. Rita Chandel and Mrs. Shalu Dulta from the department of chemistry visited the water testing lab Dhali Shimla .

This field trip was intended to gather crucial data and insights for our research on water treatment and quality analysis.

The area is essential for supplying freshwater to periphery communities.

Our visit to the Dhalli Water Catchment Area has provided us with valuable insights and data for our water treatment analysis research. This experience will be instrumental in helping us develop effective water treatment solutions for our community.
