

Report on World Ozone Day 2023

Department of Environment Science

On September 26, 2023, the Department of Environment Science at CoE, GC Sanjauli, Shimla-6 organised an event to commemorate World Ozone Day. Ozone day is celebrated across the world to raise awareness about the ozone layer's significance and the crucial role it plays in safeguarding life on Earth. The purpose of the event was to educate students and others about ozone layer depletion and the steps that may be taken to safeguard it. The event was held in the presence of esteemed Principal ma'am (Prof. Bharti Bhagra) and other professors in Art's block (R.N. 09) of CoE, Govt. College Sanjauli, Shimla-06.

Students participated in this awareness activity by making presentations and speeches. They made young people aware of the importance of the ozone layer to us, as well as the causes and consequences of ozone depletion. They also educate people about mitigation techniques and their individual role in ozone layer conservation and protection. The theme for World Ozone Day 2023 is “**Montreal Protocol: fixing the ozone layer and reducing climate change**”. Documentary screening on the history and significance of the Montreal Protocol was also organized.

The department is committed to its purpose of educating and inspiring nationals to become environmental stewards, and activities like World Ozone Day help to achieve this aim. We want to thank all of the attendees, presenters, and volunteers who helped make this event a success.

Mr. Lakhbeer Singh
Assistant Professor
Dept. of Environment Science
