Climate change is one of the most critical global concerns today with the younger generation expected to face enormous challenges in future. It is therefore important to create awareness among youth and actively engage them in the areas of preparedness, risk reduction, adaptation and mitigation. Youth not only have innovative ideas and knowledge, but also have abundant energy to undertake local actions. They can be the proverbial agents of change and can act as communicators in their communities and in the regional and international arenas.

The main objectives of the National webinar:

1. Educate and inspire about the climate change, earth Observation and its potential to address climate change issues.
2. Integrating Climate Change Measures, National policies, Strategies, Planning and improving education.
3. To step up the efforts to reduce Green House emissions and strengthen resilience and adaptive capacity to climate induced impacts.

The significant highlights of the webinar were:

1. Global warming and climate change
2. Human Fingerprints on Climate Change
3. Interaction between climate change, people and nature.
4. Raising Youth on the climate crisis.
5. Sustainable development goals.
6. Climate change perceptions and factors.
7. Climate Emergency.
8. Himalayan Region and its diversity.
- 9 Himachal Pradesh: Issues and concerns.
10. Climate change adaptation.
11. Climate Action Plan.

The eminent speakers for the webinar Dr.Parul Rishi (Associate Prof. Indian Institute), Dr RuchiMudaliar Associate Prof. S.H.G College,Bhopal and ShaliniDagur (Research Scholar, IIFM, Bhopal) discussed these issues in details.
