Policy on Waste Management for a Clean and safe Campus

Government College Sanjauli, Shimla-6

Government College Sanjauli recognizes the importance of proper waste management, including the management of e-waste and chemical waste, for the protection of the environment and the health and safety of the community. To contribute towards this goal, the college has formulated the following policy for waste management:

Waste Reduction:

The college will promote waste reduction by encouraging the use of reusable containers and discouraging the use of single-use plastics. The college will also implement a paper reduction policy to minimize paper usage.

Waste Segregation:

The college will implement a waste segregation program to separate recyclable, non-recyclable, e-waste and chemical waste. Recycling bins will be placed in all common areas of the college, and e-waste and chemical waste will be stored separately from other waste.

Proper Disposal:

The college will ensure proper disposal of e-waste and chemical waste by contracting with licensed waste management companies that specialize in the disposal of these types of waste. The waste management companies will be required to adhere to all applicable environmental regulations and standards.

Awareness Programs:

The college will organize awareness programs to educate students and staff about the importance of proper e-waste and chemical waste management. These programs will focus on the proper handling and disposal of these types of waste.

Monitoring and Reporting:

The college will monitor waste generation and disposal, including e-waste and chemical waste, on a regular basis and report progress towards waste reduction and recycling goals.

Safety Measures:

The college will implement safety measures to protect students, faculty, and staff from exposure to hazardous materials. These measures will include the use of personal protective equipment and the implementation of proper handling procedures for e-waste and chemical waste. Government College Sanjauli is committed to implementing this policy for waste management, including e-waste and chemical waste management.
