7.1.2: The Institution has facilities and initiatives for:

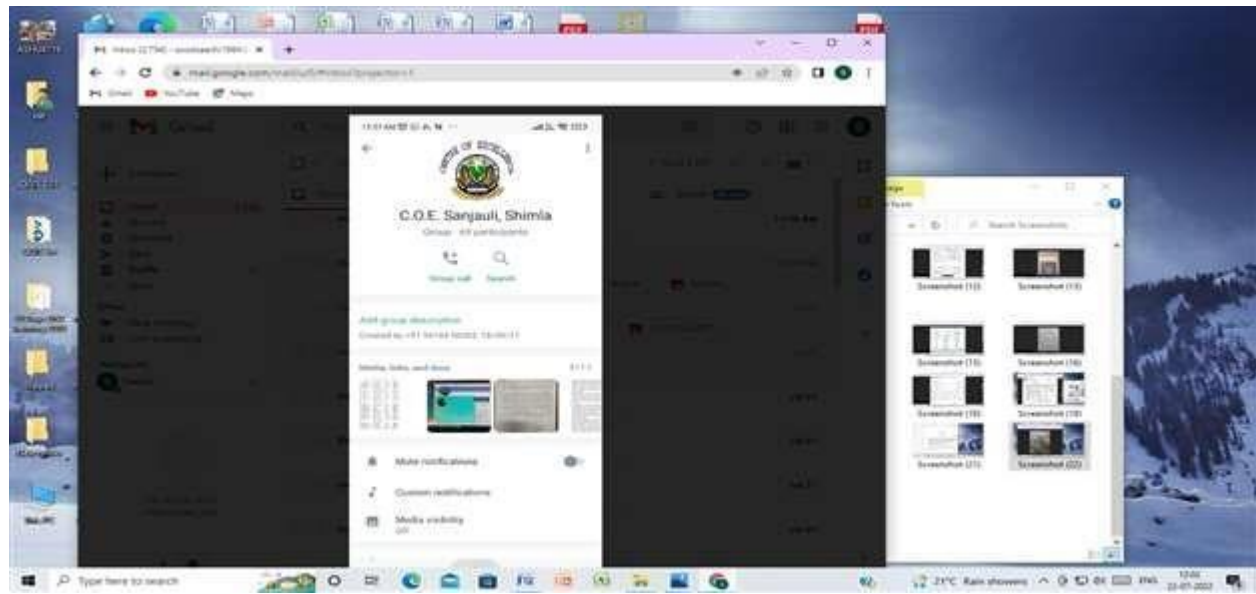

1. Alternate sources of energy and energy conservation measures

In order to conserve energy and reduce pressure on available resources we are progressively installing solar panels in the college campus and replacing existing bulbs and tube lights with LED lights. Solar

panels
and
LED
Lights

To reduce the use of papers the college is using digital platforms namely e-mails and WhatsApp to connect to the staff and students

2. Management of the various types of degradable and non - degradable waste

3. Water conservation

Water conservation facilities available in the Institution:

Rain Water Harvesting: The campus has a rain harvesting tank. Throughout the rainy season, water from the roof tops falls into the tank through rain-water outlets. The tank, however, is currently out of action because of the ongoing demolition of the old Principal's residence and proposed construction of the new Arts Block.

Before construction work:

PVC pipes used to reach the rain water to the tank from various buildings' roof
