

INSTITUTIONAL PERSPECTIVE PLAN AND

DEPLOYMENT DOCUMENTS

- **Implementation of NEP–**

The HP Government is committed to the implementation of the NEP, starting from the academic year 2023-24. As a state-owned college, Government College Sanjauli shares this commitment.

The Centre of Excellence Government College Sanjauli has developed strategies for implementing the New Education Policy (NEP) 2020 in institutional governance and is creating short-term and long-term Institutional Perspective Plans and prospective plans.

Key initiatives include mandatory professional development, collaborative decision-making, the formation of a NEP Implementation Committee, periodic reviews, and capacity-building programs.

The institution aims to foster a culture of innovation, promote diversity and inclusivity, and achieve recognition as a Centre of Excellence while continuously monitoring and evaluating progress to ensure alignment with NEP objectives and ongoing improvements.

- **Focus on research and traditional knowledge system –**

- The emphasis on research and traditional knowledge systems serves as a crucial component in the academic framework of our institution. By leveraging the combined benefits of the Incubation Cell, DBT-STAR College Status, and the implementation of the New Education Policy (NEP), we are poised to attain this objective effectively.

- **The Incubation Cell nurtures** a research-driven and entrepreneurial mindset among students and faculty, fostering an innovative ecosystem within the institution. This platform encourages the development of cutting-edge solutions and facilitates the translation of academic research into viable commercial products or services.
- **The Department of Biotechnology's Scheme for the Promotion of Academic and Research Collaboration (DBT-STAR)** College status further enhances the institution's research capabilities by providing financial support and technical guidance.
- **The implementation of the NEP serves as a catalyst for curricular and pedagogical reform**, ensuring that the institution's educational approach aligns with contemporary global standards. This policy promotes interdisciplinary learning, encourages critical thinking, and emphasizes the integration of traditional knowledge systems into the curriculum, thereby enriching students' understanding of their cultural heritage and its relevance to modern society.
 - **The establishment of the Research and Development cell and** formation of a research policy are important consideration.
 - Formation of E-Governance Policy .

- **Inclusive and safe education–**

With various bodies for Student and Employee Welfare our college has shown commitment to this end. All these bodies will continue to work effectively and will form policies like:

- Zero Tolerance to Sexual harassment
- Handbook of code of conduct
- Student Charter

- **Infrastructural development–**

Our plans include a new multi-storey Arts block; girls' hostel; parking lot for 30 vehicles; faculty rooms for all departments; installation of solar panels; renovating and upgrading Commerce block, boys' hostel, canteen, and laboratories.

- **Closer integration of IT–**

Our commitment shows in improvement in Internet access, and upgradation of classrooms, labs, library, etc. We plan to strengthen our ERP and introduce more IT-enabled solutions for labs, library and classrooms.

Like Google workspace, Vidwan Portal, Email-hosting, Soul (library) and many others.
